The Hudson Valley Advanced Manufacturing Center at SUNY New Paltz is asking for help in locating old overhead transparency films (remember the old overhead projectors?) They have been asked by regional medical organizations to use their 3D printers to make face shields. They are 3D printing the headbands and using the transparency films for the shields. Please contact Daniel Freedman, Dean of Science and Engineering at SUNY New Paltz if you have unused boxes of films or know where some can be located. His email is [freedmad@newpaltz.edu](mailto:freedmad@newpaltz.edu). Phone is 845-257-3728. Thanks!

personal protection equip

From Cristina Pope to Everyone:

10:08 AM

Personal protective equipment (PPE) is protective clothing, helmets, goggles, or other garments or equipment designed to protect the wearer's body from injury or infection. The hazards addressed by protective equipment include physical, electrical, heat, chemicals, biohazards, and airborne particulate matter. Protective equipment may be worn for job-related occupational safety and health purposes, as well as for sports and other recreational activities. "Protective clothing" is applied to traditional categories of clothing, and "protective gear" applies to items such as pads, guards, shields, or masks, and others. PPE suits can be similar in appearance to a cleanroom suit.

So along the lines of health and activities, there is an instagram trend going on advocating people post themselves doing 10 pushups to stay healthy will being secluded to the home. I'm not sure what OCPL is planning to post in totality but physical activity reminders might be a good idea
